AVERAGE: The total of all the prices of all the units divided by the number of units.

MEDIAN: The point at which 50% of the units are above that price and 50% below that price. Sometimes called the Mid Point.

INVENTORY VALUE (IV): The value, both average and median, of what sellers want for their homes in each zone.

SUPPLY: The number of available homes each month in the Zone divided by the number of contracts that month.

CONTRACT VALUE (CV): The price buyers actually paid for homes in that Zone that month. (Interesting when compared to what (IV) is in that Zone).

% OF CV TO IV: IV is always higher (What the seller wants) compared to CV which is always lower (What the buyer is willing to pay). This shows how close

Buyers are actually paying compared to asking price as a percentage. Interesting when getting Seller to price properly for the current market.
